

SELF-ASSESSMENT PROMPTS THAT ADDRESS YOUR THOUGHTS ABOUT THE WORK

	Describe	Develop, Justify, and Analyze	Relate to Other Aspects of Your Work	Translate Into Concepts
Thinking about achievement	Write a memo to someone about the most important thing you learned today.	What strategies did you use to learn something important?	Connect this knowledge to something you already know or can do.	Explain how your thinking was different from yesterday, and how it could be different tomorrow.
Looking for evidence	What is your best hard work?	How did you know you had learned something?	How does this work relate to something you already know?	Why is it important for you to know or understand or be able to do this?
Working with other people	What cooperation helped your learning?	What did you learn about working with others in doing this work?	Who do you know that would find this approach helpful?	Reflect on a conversation you had with someone else that moved your thinking forward.
Overcoming barriers	What was the tricky part?	Write down two questions you could not answer.	Find three situations where this new knowledge could be useful.	How could you broaden your thinking and learn more about what you did today?
Reframing the task	Name two things to make you think harder.	Why do you think doing it differently will help you with your learning?	When and where else could you use this information?	Represent what you think with a drawing, a matrix, a concept map, or in some other way.
