

EXAMPLE: SCIENCE STANDARDS FOR A SIXTH-GRADE FIRST QUARTER, WITH ASSESSMENT TYPES IDENTIFIED

Learning Outcome: Students Will Be Able to	Appropriate Assessment
List characteristics of pure substances and mixtures, and explain the difference between the two	Test
Classify substances as pure substances or mixtures based on their composition and behavior	Test or performance assessment
Understand that the properties of a compound differ from those of its elements, and that a compound can only be separated into elements by chemical means	Test or performance assessment
Identify elements by their physical appearance, chemical structure, and behavior	Test or performance assessment
Understand that elements can be chemically combined to form compounds	Test or performance assessment
Understand that mass remains constant during chemical reactions	Test or performance assessment
