

SEL Foundational Pre-Work Cam's Commitment Letter

Fellow Change Agent,

Welcome to the LSI SEL Measurement Team! I look forward to serving alongside you as we journey together to fulfill our social mission for children. As your teammate, I am committed to your success and will serve as an equity gatekeeper to ensure that you have every opportunity to learn, grow, and shine!

Whether you are here to further inform your SEL lens in your current role and/or are here to engage in the delivery of our unique science-backed SEL and Trauma-informed course offerings, you are an integral part of our SEL team and the LSI Family.

I am committed to modeling what it is to **be the change** as it pertains to engaging in ways that demonstrate agency and equity. I ask that you stand alongside me to compassionately challenge and disrupt anything that serves to counteract this positive change. These are distractions that will only take us off course and further away from our social mission!

As we all grow, learn, and engage together along this SEL journey, we will continue to innovate and thrive through what will be the next challenging stage. As we lift one another up through this next phase, we will rise together to be better versions of ourselves for one another and for the field that we continue to serve with compassion.

As we continue to embrace the philosophy of Ubuntu, I will continue to share pieces of my story to build the beloved community our team is committed to modeling. Because *your humanity is tied to mine*, I ask that you do the same. Through learning about one another, I commit to identifying and activating your areas of strength to help you operate with increased confidence. Activating your strengths and building your confidence in what may become your niche area(s) will serve to inform your sense of belonging and purpose.

I am honored to help support this essential work and will continue to be fueled by the uniqueness of you, the heartbeat of this work. I will continuously stand in awe of all you do within your relentless commitment to our children, the educators that serve them, and the communities that house them.

Change agent, this is our call to action! We have some good, necessary trouble we must tend to!

Yours in service,
