

How Do You Know if Your School is Standards Aligned?

Track, analyze and reach outcomes all learners need to achieve.

RigorWalk®

To equip students with 21st century skills, educators must be fluent in the use of data as a leadership tool. They also need to demonstrate their schools are providing standards-based, rigorous instruction in every classroom. There's a problem: instructional data can be messy and processing it tricky.

What if there were a fast, easy way to collect and present your data for meaningful insight? And what would it mean if you could prove exactly where your school is in terms of the standards?

Improve Student Outcomes

Align to Standards

Increase Efficiencies

LSI RigorWalk® addresses today's educational challenges with a metrics-based solution tailored to school improvement needs

Partner with LSI and become a master of your data. We help you quickly identify challenges, turn data into information to develop a tailored solution to remove barriers to student success.

- Identify scientifically accurate indicators that predict academic success
- Gain clear, graphic insights with a flexible, web-based reporting tool
- Rapidly identify building-wide instructional trends and opportunities for school improvement
- Receive on-site expert training from former school leaders, tailored to fit your demanding schedule
- Recommended professional development and solutions targeted to your identified school improvement needs

Quickly move from root cause to pedagogical solution

Instantly capture, visualize, and collaborate over the most relevant metrics—curated, validated, and scientifically analyzed to have the biggest impact on student learning.

- Visualize leading indicators of instructional trends
- Spot areas of struggle as they happen and see the source of any issue
- Get a snapshot of the overall quality of rigorous instruction
- Capture data offline on any device, then automatically sync when you're back online

"We finally have a single location where we can calibrate same-school walks done by different people. Everyone is on the same page, they know the 'look fors' and what needs to be happening in classrooms. Ultimately, the students benefit as we're looking for best practices and student evidence."

– Marian G. Grill, M. Ed.

Curriculum and Instruction Assistant Principal, Edward Hand Middle School, Pennsylvania

Our unique approach empowers your team

LSI is with you at every step to ensure your school's unique needs are identified and your targets are met. You get one day of on-site coaching that includes training on Trend Tracker, classroom walks, findings review, then questions and answers.

1

LEARN

- On-site expert training on LSI Trend Tracker
- Orientation to Trend Tracker as a measurement tool
- Review the trends known to achieve rigor

2

WALK

- Classrooms chosen for walkthroughs
- RigorWalks conducted
- Data collected and prepared for assessment

3

ANALYZE

- Look over your data input
- Review the trends and visual indicators
- Question and Answer session

4

Move ahead with a tailored solution to your school's identified needs
