

Are Conditions Impacting Your School's Performance?

Find the answer. Get research-based solutions. Clear the path to student success

ConditionsWalk®

In today's ultra-competitive and complex economy, educators are under tremendous pressure to raise academic performance in a hurry. It's critical to know if conditions support or get in the way of learning.

Many are looking to data for answers. The problem is that there is so much data. Which do you use? How do you interpret it?

Improve Student Outcomes

Align to Standards

Increase Efficiencies

LSI ConditionsWalk® addresses today's educational challenges with a metrics-based solution tailored to school improvement needs

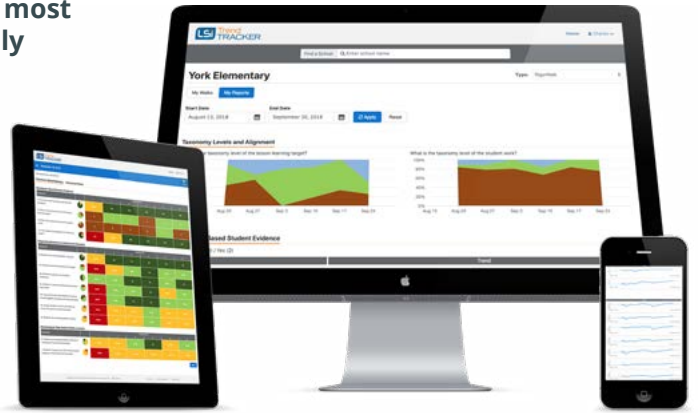

Partner with LSI and become a master of your data. We help you quickly identify challenges and turn data into information to develop a tailored solution to remove barriers to student success.

- Identify the conditions that set the environment for academic success
- Gain clear, graphic insights with a flexible, web-based reporting tool
- Rapidly identify building-wide instructional trends and opportunities for school improvement
- Receive on-site expert training from former school leaders, tailored to fit your demanding schedule
- Recommended professional development and solutions targeted to your identified school improvement needs

Where do you start? Which metrics are meaningful?

Instantly capture, visualize, and collaborate over the most relevant metrics—curated, validated, and scientifically analyzed to have the biggest impact on conditions that affect student learning.

- Visualize leading indicators of instructional trends
- Spot areas of struggle as they happen and see the source of any issue
- Put numbers and metrics to “feelings” of improved school conditions
- Capture data offline on any device, then automatically sync when you’re back online

“Before starting with LSI, we were deemed a turnaround school under District Administrative sanctions. In one year, we went from a ‘D’ to an ‘A’. Teachers are intentional in their lesson planning and the work they are doing, and students are engaged in rich tasks that are aligned to the standards.”

– Willette Houston,
Principal, Bear Creek Elementary, Pinellas County Schools, Florida

Our unique approach empowers your team

LSI is with you at every step to ensure your school’s unique needs are identified and your targets are met. You get one day of on-site coaching that includes training on Trend Tracker, classroom walks, findings review, then questions and answers.

1

LEARN

- On-site expert training on LSI Trend Tracker
- Orientation to Trend Tracker as a measurement tool
- Review the trends known to achieve rigor

2

WALK

- Classrooms chosen for walkthroughs
- ConditionsWalks conducted
- Data collected and prepared for assessment

3

ANALYZE

- Look over your data input
- Review the trends and visual indicators
- Question and Answer session

4

Move ahead with a tailored solution to your school’s identified needs
