

Turnaround School Partnership: A Proven School Transformation Approach

School Leadership Coaching

Faculty Coaching

Community Engagement

Performance Metrics

Empower Widespread Success for the New Economy and Careers that do Not Yet Exist

Unparalleled Guidance

LSI's Turnaround School Partnership provides schools with an option to **invest in people and systems** for effective, rigorous core instruction and school leadership. The model transforms low-performing schools into high-performing, sustainable, scalable models of next generation instructional systems.

- Comprehensive Support and Improvement
- Address root causes of low performance with Targeted Support and Improvement
- Quickly exit state requirements for additional supports and accountability

Defined Objectives And Expected Outcomes

- **Strong principals** who lead and implement the change vision for a model school
- **School leadership teams** that recognize and support rigorous teaching and learning of academic standards with new economy skills
- **Next generation PLCs** that focus on real-time data systems focused on achievement of academic standards with team-centered rigorous instruction
- **Response-to-Intervention systems** that move from using lagging data to leading data with the goal of reducing the need for interventions through focusing on improving core instruction
- **Curriculum** that focuses on student-centered instruction with real-world applications
- **Expert instructional coaches** who coach and guide peers to high levels of team-centered instruction
- **Empowered Teachers** who guide and inspire students with rigorous team-centered core instruction and new economy skills
- **Engaged students** who are self-disciplined, collaborative, and creative thinkers, who utilize social, emotional, and cognitive (SECL) skills as an integral part of classroom life, and are prepared to thrive in a 21st Century economy
- **Involved communities** that take pride in their school as a place of joyful learning

Helping Struggling Schools to Serve the Needs of Today's Students by Providing a Proven Transformation Approach.

Turnaround School Partnership

LSI leverages coaching as a predominate support to schools to gauge and magnify the implementation effects. LSI's Faculty and School Leadership Coaches provide support through side-by-side leadership coaching, classroom walkthroughs, instructional coaching, PLCs, and honest, immediate, and specific feedback.

School Leadership Coaching

Build the skills of the school leader through an individualized, job-embedded, and focused mentoring to recognize rigorous instruction and evidences of student learning. School leaders are then able to support teachers as they plan and deliver rigorous, standards-based lessons.

Faculty Coaching

Help coaches/teacher leaders support teachers to look for lesson effects as they implement their learnings from PD. PLC support is also offered to develop self-supporting, effective instructional teams. PLC groups review strategies and resources from the PD and available data for planning purposes to inform next steps or mitigate the need for interventions.

Metrics

LSI measures the growth and success of our partnership using continuous metrics including:

- LSI Rigor Diagnostic
- LSI Standards Tracker percent of students attaining "Met Standards" criteria
- Engagement of teachers in PD activities
- Metrics of actual teacher implementation of strategies learned through PD
- Principal engagement and monthly progress toward action board goals
- Gains in Student Achievement as evidenced by
 - » Change in school letter grade
 - » Change in proficiency in Reading and Math FSA
 - » Meaningful change in scale score across years controlling for student demographics
 - » Major increases in the FSA scale score using a quasi-experimental design with propensity matching to like students
- Extremely satisfied students, parents, and teachers, as evidenced through climate surveys from past district surveys
